STEWART GLAPAT

ADJUSTOVEYOR

MADE IN THE USA

ELEVATE YOUR OPERATIONS TO NEW HEIGHTS!

- Ergonomics meets efficiency
- Eliminates overhead lifting with adjustable platform
- Safely adjusts your working height using push-button control

- Maximizes trailer space utilization
- Self-leveling platform ensures consistent stability
- Integrated microprocessors, VFDs, and category 3 safety circuits

Ever since our company founder invented the very first Telescopic Conveyor in 1946, Stewart Glapat has set the industry standard in Extendable Conveyor Technology. A recent innovation, the Man-on-Board Adjustoveyor, provides the optimal combination of ergonomics and efficiency. By incorporating the front-end platform enabling height adjustment, your operations team no longer needs to strain to lift heavy packages overhead.

Man-On-Board Adjustoveyor

STEWART GLAPAT

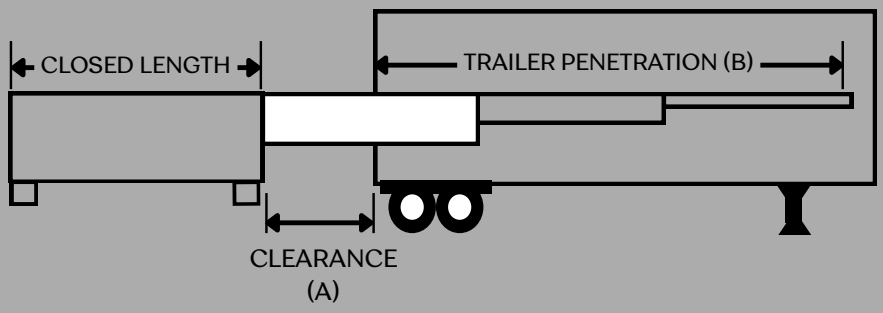

ADJUSTOVEYOR

MADE IN THE USA

Choosing the Right Adjustoveyor:

Step 1: Determine the necessary clearance for building wall, dock levelers, aisleways, etc. (A)

Step 2: Determine required trailer penetration (B)

Step 3: A + B = Cantilevered Extension

Model Number	Closed Length	Overall Extended Length	Cantilevered Extension
Triple Boom Adjustoveyors			
3083T	30'-0"	83'-0"	53'-0"
Four Boom Adjustoveyors			
2577Q	25'-3"	77'-0"	51'-9"
2984Q	29'-10"	85'-5"	55'-7"
3393Q	33'-0"	95'-8"	62'-8"

Requires a 30" minimum belt width
